Quick answer

On iOS, EchoForge: Voice Changer scores highest (3.85); on Android, EchoForge: Voice Changer scores highest (3.60). Neither was measured on a device.

- **Best overall (iOS):** EchoForge: Voice Changer. Highest weighted total on iOS (3.85 of 5), 1.15 ahead of Voloco; listing states offline use, no account and Data Not Collected.
- **Best overall (Android):** EchoForge: Voice Changer. Highest weighted total on Android (3.60 of 5), 0.55 ahead of AI Voice Changer Effects Echo; listing states 100% offline and no data collected.
- **Best if (iOS):** Edit any audio, sound: Edity. Pick it if you need many export formats such as MP3, FLAC and AIFF; total 2.60, but in-app purchases reach $13.99.
- **Skip (Android):** Voice changer effects: echo…. Lowest Android total (1.55 of 5): last update January 3, 2025, contains ads, and may share location with third parties.

Which app should you pick?

If you need	Pick	Platform	Why
Works offline without an account	EchoForge: Voice Changer	iOS	Listing says it works fully offline and needs no account.
Works offline without an account	EchoForge: Voice Changer	Android	Listing says it works 100% offline with no account.
Least data collected	EchoForge: Voice Changer	iOS	Privacy label reads Data Not Collected.
Export to common formats	Edit any audio, sound: Edity	iOS	Lists Flac, Wav, Mp3, M4a, M4r and Aiff export.
Adjust echo and reverb	Voice Changer - Audio Effects	Android	Lists echo, reverb, pitch, tempo and equalizer controls; 4.1 stars from about 70K reviews.
No ads	EchoForge: Voice Changer	Android	Listing says no ads and no subscription; price tag not shown.

Best for and not the best choice for

Best for

- EchoForge: Voice Changer on iOS for streamers who want offline echo and reverb with M4A or WAV export and no data collected.
- EchoForge: Voice Changer on Android for creators who want offline echo and reverb without ads, as stated in its listing.
- Edit any audio, sound: Edity on iOS for creators who need many export formats and accept

in-app purchases.

Not the best choice for

- Voice Changer Audio Effects on iOS for creators who want echo and reverb: its listing mentions neither and its privacy label lists tracking.
- Voice changer effects: echo… on Android for anyone who wants current updates or no data sharing: last updated January 3, 2025.
- Lexis Audio Editor on Android for creators who need echo and reverb: its listing does not mention them and mp3 saving needs the paid version.

How do the apps compare?

Is EchoForge: Voice Changer good for streamers and creators making short voice clips? (iOS)

EchoForge: Voice Changer is a good fit for streamers and creators making short voice clips on iOS, with the highest weighted total at 3.85 of 5. Its listing says it works fully offline with no account, offers echo and reverb in custom chains, exports M4A and WAV, and shows Data Not Collected. It has no ratings yet.

- Price: Free
- Ads: No, per description
- In-app purchases: None listed; description says no paywall
- Account: None required
- Offline: Yes, works fully offline
- Privacy label: Data Not Collected
- Last update: Version 2.0, Aug 19 (year not shown)
- Rating (count): Not enough ratings to display (unverified)
- Developer: lapnito.cz s.r.o.

Pros

- Offline, no account, Data Not Collected.
- Echo and reverb plus M4A and WAV export.
- Free without ads per listing.

Cons

- No rating overview yet, so reliability is unverified.
- Update year not shown on the page.

Choose it if: You want offline echo and reverb with M4A or WAV export and no data collection on iPhone.

Skip it if: You need rating-based evidence of stability before installing.

Is Voloco: Vocal Recording Studio good for streamers and creators making short voice clips? (iOS)

Voloco: Vocal Recording Studio is an adequate fit for streamers and creators making short voice clips on iOS, with a weighted total of 2.70 of 5. It exports WAV or AAC and has 4.8 from 87K ratings, but its listing does not state offline use, lists tracking identifiers, and in-app purchases run up to $59.99.

- Price: Free
- Ads: Yes, advertising listed
- In-app purchases: Yes, $5.99 to $59.99
- Account: Not stated (unverified)
- Offline: Not stated (unverified)
- Privacy label: Identifiers used to track you
- Last update: Version 9.21.0, 6d ago
- Rating (count): 4.8 (87K)
- Developer: Resonant Cavity, Inc

Pros

- 4.8 from 87K ratings.
- Frequent updates.
- WAV or AAC export.

Cons

- Tracking identifiers declared.
- Subscriptions up to $59.99 per year.

- Offline use not stated.

Choose it if: You want a widely rated vocal studio with WAV export and accept ads and purchases.

Skip it if: You need confirmed offline use or no tracking.

What we measured on a device

This audit is a desk review of store listings, privacy labels, developer pages and independent articles; no app was installed or measured on a device for this report.

How we decided

Each app was scored 0 to 5 on eight criteria: core task fit (0.20), accuracy and reliability (0.15), offline use and no account (0.15), privacy (0.15), ads and price (0.10), accessibility and localisation (0.05), maintenance (0.10) and risks (0.10; Q1 to Q8). The weighted total is the sum of score times weight divided by the weights. A gap of 0.3 or less is a tie, and ties are never broken by opinion. Every score cites a store page read on 2026-11-05. Facts that a page did not state are marked unverified and scored 0 or 1. This was a desk review of store listings; no device tests were run.

What we could not verify

- Rating and review count of EchoForge: Voice Changer were not shown on the App Store page (not enough ratings) or Google Play page.
- Price, permissions, minimum Android version and languages of EchoForge: Voice Changer on Google Play were not shown.
- Offline use and account requirement of Voloco, Edit any audio, sound: Edity, Voice Changer With Echo Effect and Voice Changer With FX Effects on iOS were not stated.
- Offline use of Voice Changer - Audio Effects, Lexis Audio Editor and Voice changer effects: echo… on Google Play was not stated.
- Accessibility features were not declared on any App Store listing except in the EchoForge description; Google Play pages showed none.
- Export formats of most Android candidates and several iOS candidates were not specified.
- No independent review or hands-on test of echo and reverb quality was used; claims come from developer listings.

This is a desk review of store listings read on 2026-11-05 from the US storefront (Apple App Store) and Google Play with hl=en and gl=US. No app was installed or tested, so echo and reverb quality, stability and export results are unmeasured. The page-reading tool returned extracts rather than full page text, so evidence is marked as paraphrase. Ratings, prices and update dates change often. Several listings did not state offline use, price or permissions, and those facts are marked unverified. No independent reviews were used.

Frequently asked questions

Does EchoForge: Voice Changer work offline on iPhone?

Yes, according to its App Store listing: EchoForge: Voice Changer works fully offline, keeps audio on the device and needs no account. It exports M4A and WAV and its privacy label reads Data Not Collected. It scored 3.85 of 5 overall, but no device test was made.

Is EchoForge: Voice Changer free on Android?

Its Google Play page says no ads, no subscription and every voice effect included, but the page did not show a price tag. It scored 3.60 of 5 on Android, and the data safety section lists no data collected. Check the live page for the current price.

Which iPhone voice app exports the most file formats?

Edit any audio, sound: Edity lists six export formats: Flac, Wav, Mp3, M4a, M4r and Aiff, with 4.4 stars from 324 ratings. It scored 2.60 of 5 overall because offline use is not stated and in-app purchases range from $6.99 to $13.99.

Which voice changer app collects no data on iOS?

EchoForge: Voice Changer, Voice Changer With Echo Effect and Voice Changer With FX Effects all show Data Not Collected on the App Store. Their totals are 3.85, 2.45 and 2.60 out of 5. The last two are paid apps at $2.99 and $1.99.

Does Voloco work without an internet connection?

Offline use is not stated on the Voloco: Vocal Recording Studio App Store page, so it is unverified. The listing shows 4.8 from 87K ratings, WAV or AAC export, tracking identifiers on the privacy label, and subscriptions up to $59.99. Its total is 2.70 of 5.

Which Android voice changer has the most reviews?

Lexis Audio Editor shows about 151K reviews at 4.6 stars, and Voice Changer - Audio Effects shows about 70K at 4.1. Their totals are 2.40 and 2.85 of 5, because both contain ads and neither states offline use on its listing.
